Hi all,

Pardon my ignorance on this one, but who would be the lead for entering a lookout and can we go ahead and enter one asap?

Mike - quick question. Can we go ahead and put a Lookout in for this individual or is that work already underway?

Open source queries lead me to an individual working for a security company, [Person], in Illinois, USA. As you can see below, the phone number of the first image is the phone reported to the BIS line. The user of this platform also use the handle [Personal] which is somewhat consistent with the email address given to the BIS line ([Personal Info.]). His Pinterest handle is [Personal] and based on the photo used, it looks like the same individual. The same individual seems to have made anti-LGBTQ comments on the site Quora 6 years ago.

Database queried:

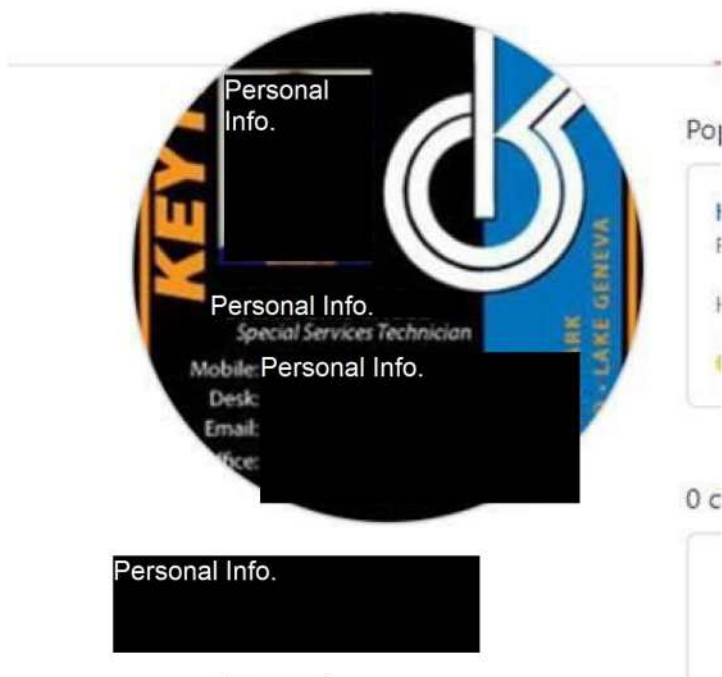

IMS – **Negative** for [Personal Info.] [Personal Info.]

ICES – **Negative** for travel history for [Personal Info.] since 2000/01/01

ICES- **Negative** for previous seizures

GCMS – **Negative** for [Personal Info.]

CPIC/NCIC – **Negative** (as you need a DOB to query this database I assumed that [Personal] was born in [Pers] based on his various handles)

Hi Brad,

Although this does not seem very credible at first glance, the fact that the originator researched the CBSA Contact Us form and repeated similar messages tells me that we should follow up on this.

Could you confirm Prairie Intel has informed RCMP Intel of this threat?

Thanks,

Pierre
